

Department of Mechanical and Process Engineering

Mechanical Engineering and Process Engineering integrate different systems from classical mechanical engineering as well as electrical and process engineering to produce competitive products. Apart from the technical know-how, engineering science requires economic, ecological and social competences. Our students position themselves for careers in the fields of mechanical engineering, environmental engineering, mobility, biotechnology, and energy and building technology. Besides a wide range of course offerings, company internships and close cooperation with industry provide for the practical experience covered by future employers.

Bachelor's Degree Programs at M+V

- KOMBI-Studium (dual degree studies)
- Angewandte Biomechanik
- Biomechanik
- Energiesystemtechnik
- Maschinenbau
- Maschinenbau/Werkstofftechnik
- Mechatronik
- Mechatronik plus (with teaching degree option)
- Verfahrenstechnik (Bio-/Umwelt-/Energietechnik)

Master's Degree Programs at M+V

- Berufliche Bildung Mechatronik
- Energy Conversion Management
- Mechanical Engineering
- Power and Data Engineering
- Process Engineering
