

Application

Requirements

Online Application and Deadlines

Applicants should meet the following requirements or their equivalents:

- Academic Excellence: Your Bachelor's final grade should be above average (B or better, 3.0 or better, ...)
- English language proficiency, approved by TOEFL PBT 550, or TOEFL iBT 79, or IELTS 6.0 (does not apply for native speakers)
- German language proficiency (see note below): level B1 of the Common European Framework of References for Languages (does not apply for native speakers)
- A bachelor of science degree in either Electrical Engineering, Computer Science, Mechanical Engineering, Process Engineering or Energy Engineering is recommended
- Willingness to integrate into an international environment in which different cultures, ideas, perspectives, and approaches will be encountered
- Readiness to attend German language courses in order to better learn about German culture and daily life in this country

An important note regarding the proof of your language skills:

It is not required to prove your English and German proficiency at the time of application - your application will still be taken into account by the Selection Committee regardless of your language skills. However, it is absolutely essential to prove your language skills BEFORE starting the study program in October.

Should you be selected for the program without having submitted any language certificate yet, your admission will be provisional – and turned into a final admission only after providing the missing documents (by the beginning of October the latest). If by the beginning of October these documents are still missing, your admission will not be finalized and you won't be enrolled in the program.
