

## Career

A qualification in Power and Data Engineering opens doors to fulfilling and successful careers in a wide range of sectors, including the following:

- energy companies with worldwide operations
- international utilities
- regional utilities in Germany
- international engineering companies
- manufacturers of power plant equipment for renewable energy conversion
- grid operators
- energy trading companies
- energy research institutes
- public agencies in the energy sector
- energy management positions in various branches

In cooperation with one of our partner universities, Offenburg University also offers some graduates of our Master's degree programs the possibility to pursue a doctorate, as for example at the University of Freiburg's [Graduation School KleE](#) in cooperation with the Fraunhofer ISE institute.
